Imported Crystal Masterpieces

Down through the years crystal chandeliers have been recognized as symbols of luxury and refinement . . . aristocrats of lighting.

Bohemia Import Company Inc. is proud to present an exceptional line of outstanding imports which have been inspired by the finest designs.

Crystal in its natural state is a small piece of "rock" or mineral which lends itself to the production of an unusual glass that can be cut and polished like the finest gem. Each edge becomes sharp and true so that wood polishing will produce the icy clarity and fiery brilliance associated with pure crystal.

In Europe, almost every home is an integral part of crystal manufacturing. The art of polishing and cutting is handed down from one generation to another. Each piece is handled individually . . . painstakingly.

It is from this source that these handsome reproductions have been imported. Each is uniform in quality and in impeccably good taste.

To own a Bohemia Import Crystal Chandelier is to own the best that money can buy.
